

Empowering Business with Seamless Cloud Technology.

CloudFusion

Hello!

I'm Carl Lowe, Managing Director at CloudFusion, and I appreciate your interest in our services.

At CloudFusion, we understand the challenges businesses face with cloud technology.

As technology evolves, effective communication through the cloud becomes crucial. However, determining your specific needs and costs can be challenging.

With over 25 years of experience, we offer customised, transparent, and dependable solutions. This means that while we take care of all your cloud technology requirements, you can focus on growing your business.

Thank you for considering CloudFusion as your partner for cloud services and communications solutions. We look forward to working with you.

Kind Regards,

CloudFusion is a technology company driven by a vision.

A vision to educate, support, and advise clients on optimal cloud and automated technology solutions.

We believe in transparency and simplicity, offering straightforward pricing that allows you to optimise your budget and invest in what truly matters for your success.

Complete solutions for cloud capability.

At CloudFusion, we recognise the significance of staying ahead in today's technology-driven landscape.

That's why we offer a diverse range of cloud technology solutions and services, meticulously designed to empower your organisation and fuel unprecedented success.

From cutting-edge cloud technology consultancy and secure network connectivity to advanced telecoms, managed IT services, and cybersecurity, we comprehensively cover every step of your journey towards a brighter business future.

Connectivity

CloudFusion is your trusted partner for ensuring peak performance and dependable network connectivity.

With decades of experience in delivering data connectivity services, we closely collaborate with industry-leading technology partners to optimise your business operations.

- Business Broadband
- SoGEA
- FTTP Broadband
- Leased Lines
- SD-WAN

Our
Services

Connectivity Pricing Plans

Create your own CloudFusion connectivity solution, select your package dependent upon your single or multi-site requirements.

Fibre Broadband

From **£24.95** +VAT per month

SoGEA broadband

- ✓ Download speed up to 20Mb
- ✓ Low cost service
- ✓ Over 99% UK coverage

SoGEA broadband uses fibre-based technology from the local exchange to the PCP (the green street cabinets) to deliver broadband to your business premises. This provides fast speeds of up to 80Mbps and greater stability than traditional copper-based phone lines. SoGEA lines boast a more reliable connection with a much lower risk of downtime due to faults. With a higher than average bandwidth and superior speeds SoGEA is the perfect alternative to PSTN for any business.

Full Fibre Broadband

From **£34.95** +VAT per month

FTTP broadband

- ✓ Download speed up to 1Gb
- ✓ Dedicated fibre to the premises
- ✓ Fastest broadband available

FTTP, also known as Full Fibre, is fibre to the premises. It uses fibre optic cabling between your local exchange and your business premises. Because only fibre optic cabling is used, FTTP offers much faster and more reliable broadband and is significantly better than broadband that uses copper alone.

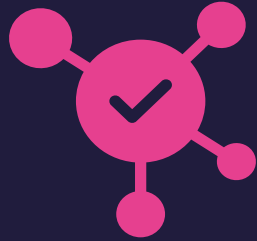

Fibre Lease Line

From **£195.00** +VAT per month

- ✓ Up to 10Gb dedicated bandwidth
- ✓ 24/7 proactive monitoring
- ✓ Symmetrical speeds

A business leased line is a private internet connection which goes directly from the internet service provider's (ISP) data centre to your offices or workspaces. And, since it isn't shared with other businesses, you can rely on consistent speeds and reliable connectivity. Even at the busiest of times, your connection will deliver peak performance and enable optimum levels of efficiency and productivity.

Our
Services

Staying at the forefront of technology.

With CloudFusion, you can trust that our commitment to delivering excellence extends to every aspect of our service. We strive to provide you with industry-leading solutions that empower your business and drive your success in the ever-changing technological landscape.

Technology is constantly evolving, which is why our teams at CloudFusion are dedicated to establishing partnerships with leading suppliers of the most innovative services and manufacturers in the industry. Our long-standing relationships, preferential agreements, and accreditations with these suppliers serve as a testament to our commitment to delivering best-in-class products, solutions, and services to your business.

1

Consult

We begin by understanding your precise needs. This is achieved through a comprehensive review of your current technology services, gathering insights into how it will impact your business's growth and success.

2

Advise

Next, we provide recommendations for Cloud Technology solutions that enhance and streamline both internal and external processes within your business. Our suggestions aim to deliver cost savings, heightened efficiency, and an improved customer perception.

3

Manage

Our next step involves collaborating with your existing suppliers to ensure seamless integration with your current technology infrastructure. If you are nearing the end of a current agreement and need assistance with contract negotiation, we will provide support.

4

Deliver

Using our extensive project management expertise, we will oversee precise delivery and performance during the installation stage, ensuring a seamless transition. This encompasses managing the delivery of new equipment and coordinating engineers as needed.

We take pride in delivering end-to-end solutions...

At CloudFusion, we go beyond simply providing a solution. We consult, advise, manage, and deliver results, setting us apart from other technology providers.

Simplifying the cloud transformation journey...

Harnessing the power and flexibility of the cloud enables organisations to achieve cost reduction, increased efficiency, improved reliability, and enhanced scalability.

Additionally, effective cloud technology equips employees with more effective tools and elevates customer perception, offering improved service levels and faster response times. Prioritising high-quality cloud capabilities therefore drives business growth and boosts customer satisfaction.

However, in a new, competitive, and ever-evolving industry, finding optimal solutions without unnecessary equipment, features, and expenses can be challenging.

CloudFusion specialises in streamlining cloud technology transition for businesses like yours, allowing you to focus on business growth while we handle your cloud technology requirements.

With 25+ years of experience in telecoms, IT, and cloud computing, we integrate various cloud solutions and services, simplifying the process for our clients. Our expertise ensures a smooth transition, empowering your business with enhanced agility, responsiveness, and cost efficiency.

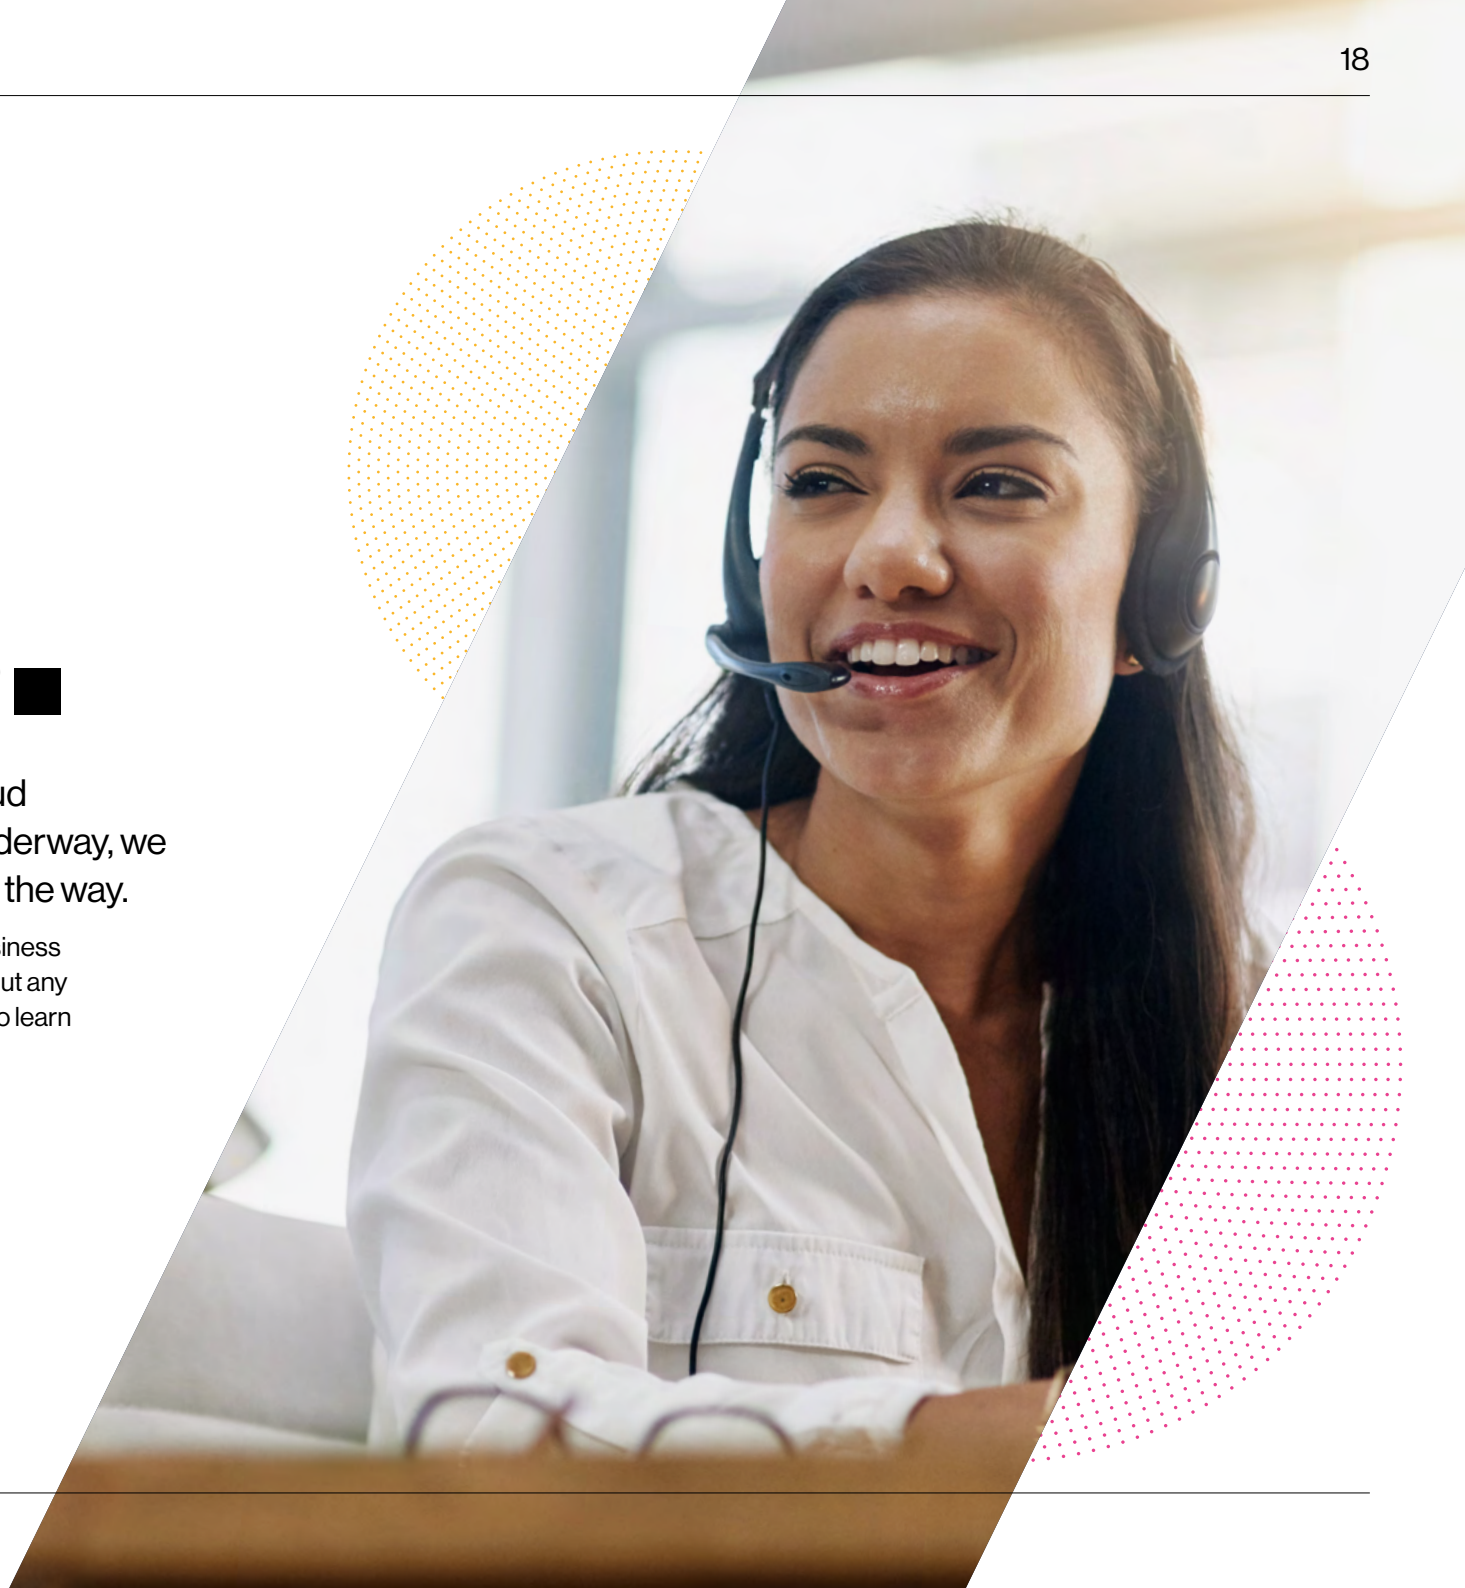

Talk to us.

Whether you're just starting your cloud transformation journey or already underway, we are here to support you every step of the way.

Our custom cloud solutions are tailored to your business needs, ensuring that you have what you need without any unnecessary upselling. Get in touch with us today to learn more about how we can assist you.
